EDUCATION

University of Southampton

UK

Master of Design management, Winchester School of Art

Sep 2024-Sep 2025

- **Main modules:** Intelligent Service Design, Design Strategy and Strategic Management, Service Design Blueprinting, User Research and Data Analysis, Project Management, Digital Transformation.
- **Dissertation:** Usability Evaluation and Management Strategy for Industrial IoT Platform Interaction Design under the Dual-Carbon Policy.
- **Certificates:** Google User Experience (UX) Design; Alibaba ACP AI Certification.

Dalian University

Dalian

BA Fashion and Apparel Design Art Academy

Sep 2019-Jul 2023

- **Main modules:** User Psychology, Design Psychology, Brand Market Research, Brand Strategy and Visual System Design, Project Practice Management, Innovation and Entrepreneurship, Business Models.

SKILLS

- **AI Product:** Experience in LLM-enabled products, including knowledge-base Q&A, RAG, multimodal content generation, prompt optimisation, output evaluation and workflow design.
- **AI Tools & Development:** Skilled in Coze, Figma, Claude Code, Cursor and GitHub, with hands-on experience in SQL/Python, Multi-Agent workflows, SSE API, MediaPipe and Three.js.
- **Data & Product Insight:** Proficient in SPSS, SQL and Python for data analysis, business-metric breakdown and insight-driven product iteration.
- **UX Research & Design:** Experienced in user research, requirement definition, information architecture, prototyping and usability testing, guided by user empathy and the Double Diamond model.

PROFESSIONAL EXPERIENCE

Mailman Digital Marketing -- User Analysis

Shanghai Jun 2021 - Sept 2021

- **Tokyo Olympics project:** Analysed differences between Chinese and Japanese users in visual aesthetics, cultural symbols and information density, and produced a localisation methodology for streaming-media materials.
- **Qatar World Cup project:** Designed five push-content schemes based on streaming-media users' consumption characteristics, optimising content structure and communication hooks.
- **Beijing Paralympic press conference:** Clarified the information hierarchy for three core user groups and built the material architecture, serving more than 100 guests and media participants.

PROJECT EXPERIENCE

Janong Group

AI Product Manager

AI Store Visit Assistant Agent

Shanghai Jan 2026 - Mar 2026

- Designed an AI store-visit workflow for FMCG supervisors, connecting store-data lookup, issue prioritisation and route planning into one automated process.
- Built the query-rewrite and RAG logic, retrieving 16+ store dimensions and applying five-level priority rules to identify stores requiring attention.
- Defined 14 field mappings, seven rewrite rules and Amap POI fallback logic, reducing visit preparation from around 1.5 hours to several minutes.

AI Customer Service Agent

Feb 2026 - Apr 2026

- Built a Douyin after-sales service Agent that reads historical conversations and classifies user issues into logistics, payment, after-sales or unclear scenarios.
- Split the service flow into scenario recognition, solution judgement, solution lookup and final response generation, reducing the risk of one large model going off track.
- Designed a maintainable solution-library process with tone control, duplicate-reply checks, salutation rules and bad-case iteration paths.

AI Interview Assistant Agent

Sept 2025 - Dec 2025

- Developed modular recruitment workflows covering JD structuring, CV parsing, interview-question generation and person-job matching.
- Routed PDF, DOCX, TXT and Feishu documents into unified structured inputs, generating targeted interview questions and 1-5 star matching reports with supporting evidence.

AI Contract Agent

Aug 2025 - Oct 2025

- Separated contract processing into two workflows: rule-based risk review and two-version comparison, avoiding confusion between clause assessment and text diffing.
- Required each review output to include risk level, original clause quotation and directly replaceable revision advice, making the review evidence auditable.

Vibe Coding

2025 - 2026

- Integrated four Coze Agents into the Zenith Space portfolio website, enabling real-time dialogue, SSE streaming output and cross-iframe state synchronisation.
- Built interactive front-end experiences with Three.js, MediaPipe Hands and Canvas, including 3D scenes, gesture-based kite assembly, particle effects and progressive workshop levels.

AWARDS

- China Collegiate Digital Creative Design Competition Final - Best Design Award.
- Milan Design Week China Collegiate Design Discipline Teachers and Students Outstanding Works Exhibition, National Final - Second Prize.
- 14th National Exhibition of Fine Arts - Work selected for exhibition in Beijing.
- Provincial Undergraduate Microfilm Competition - First Prize for Annihilation.
